

Let's make a Thymio Toppler to knock down towers.

Step 1: Prepare the things below.

LEGO Towers

Step 2: Watch the demonstration video to get some ideas.

Step 3: Time to topple!

Build each tower and use Thymio to knock it down (topple it).  
If you can topple it three times in a row, build the next size tower and try again.

You can use anything you want to help Thymio out, but you cannot use other motors or electronic machines.

Show a video of your biggest tower falling down!

1x1x3

2x2x6

3x3x9

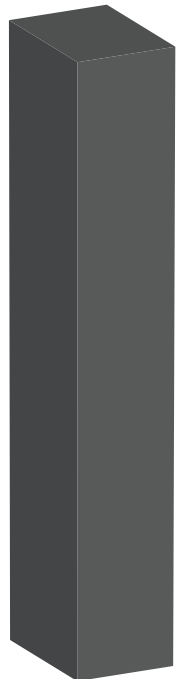

4x4x12

5x5x15

6x6x18

7x7x21

Step 4: Share pictures and videos of your mission!
