

Let's make a digital drum machine using Scratch and Thymio!

Step 1: Watch the video below and prepare the following things.

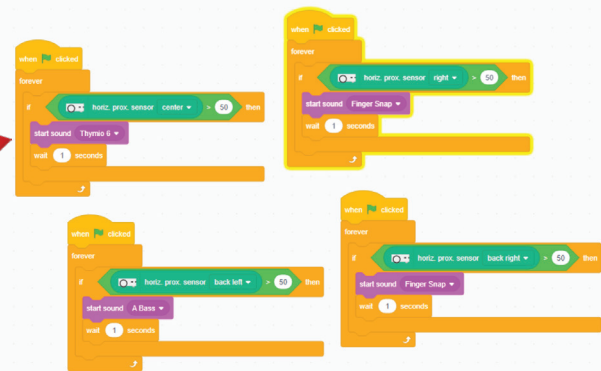

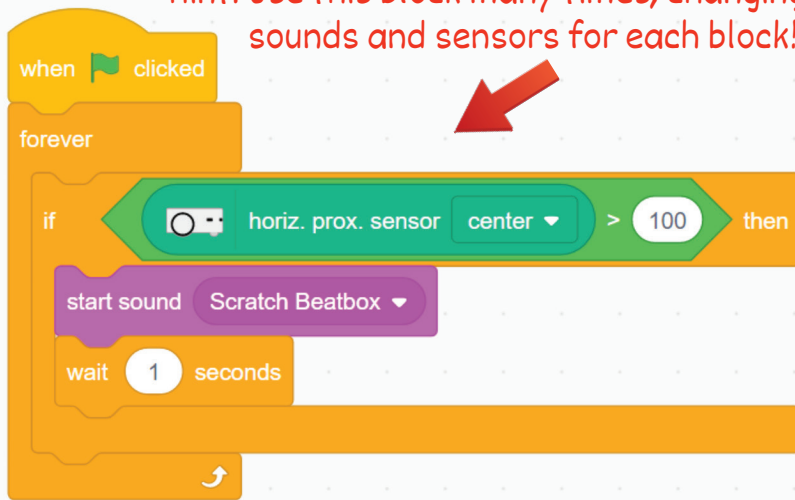

Step 2: Open Thymio Suite, connect Thymio, and launch Scratch. Choose some sounds to use with Thymio.

Step 3: Start with the front and back sensors and add a sound to each one. Then, when you put your fingers in front of the sensors, you can play many sounds at the same time.

Hint: Use this block many times, changing the sounds and sensors for each block!

Step 4: Share pictures and videos of your mission!

Share your work!
